

ASHUTOSH PRADHAN

Bhubaneswar, Odisha | ashutoshpradhan8013@gmail.com | +91 7205569042 | ashutosh-portfolio | linkedin | Github

PROFESSIONAL SUMMARY

Enthusiastic Software Developer for designing, developing and maintaining web applications across the entire stack. Strong analytical skills and a commitment to creating efficient, scalable and user-focused solutions.

EDUCATION

GIFT Autonomous, Bhubaneswar

2022 – 2026

B.Tech in Computer Science and Engineering | CGPA: 7.2

TECHNICAL SKILLS

Languages: JavaScript, Python

Backend: NodeJs, ExpressJs, RESTful APIs

Frontend: HTML, CSS, React.js, Redux, Ajax, Bootstrap, Tailwind CSS

Database: MySQL, MongoDB

Cloud & DevOps: Docker, Git, GitHub, CI/CD, Kubernetes

Core Concepts: System Design, DSA, Networking, Debugging, Problem Solving

PROFESSIONAL EXPERIENCE

Software Engineer Intern | SakRobotics Lab Pvt. Ltd.

Oct 2025 - March 2026

Bhubaneswar, Odisha

- Developed responsive and dynamic user interfaces to enhance usability and performance.
- Collaborated with cross-functional teams using version control tools and agile methodologies.
- Gained practical exposure to software development.

Intern Trainee | Strving Squad Pvt. Ltd.

Jun 2024 – July 2024

Bhubaneswar, Odisha

- Worked on project car rental app using ReactJs and TailwindCSS, implementing features like car listing, Booking from and user-friendly UI.
- Collaborated with mentors to debug, optimize, and improve application performance.

PROJECTS

Shopnesh - Ecommerce Platform

MongoDB, React.js, NodeJs, Razorpay, ExpressJs

Platform with role based access (Admin, User, Delivery Agent) and secure authentication, designed to provide seamless online shopping and real-time order tracking.

- Implemented real-time order tracking using Socket.IO, improving user experience and order transparency
- Designed optimized RESTful APIs and MongoDB schemas for faster data processing and improved backend performance

Drowsiness Detection System

Python, OpenCV, Dlib, NumPy

A real-time computer vision system that detects driver drowsiness by monitoring eye movements and facial landmarks to prevent accidents

- Implemented alert mechanism that triggers warnings when prolonged eye closure is detected, improving driver safety
- Optimized frame processing for faster detection and real-time performance on standard hardware

Car Rental Application

ReactJs, TailwindCSS

A responsive frontend web application for browsing and booking rental cars with a clean and user-friendly interface.

- Developed a single-page application using React.Js with reusable components and efficient state management
- Build interactive car listing, search and filtering functionality to improve user navigation

CERTIFICATIONS

- NPTEL Certification** – Introduction to Industry 4.0 and industrial Internet of Things
